

# ROBEL North America Product Line Card

## Keep America Moving

### ROMITAMP 2.0 Tamping Machine

#### Fast and versatile tamping

- Correct track geometry in a short time
- Easy transport by road and rail
- Functions can be expanded with modules
- Conversion to different track gauges
- Tamps on both sides or in switches
- Tamping operation in both directions
- Rapid deployment with an integrated on/off tracking device

### ROLAY Sleeper Laying Unit

#### For precise unloading, transporting and laying of all types of single sleepers.

- Fully automatic single sleeper laying
- One-man operation
- Simultaneous lifting or lowering of beam at full speed
- Precise laying of the sleepers
- Protecting ballast bed and sleeper quality
- Suitable for work on short, medium and long sections of track

### ROTHREAD Rail Threader

#### For continuous gradual repositioning of rails to the desired track gauge.

- Automatic adjustment to the track gauge during travel
- Auxiliary rubber wheels for rerailing and unrailing at level crossings
- Engine stop
- Rail tongs protected from twisting or tilting
- Roof protects operator from adverse weather conditions
- LED light illuminates working area

### ROREXS System Rail Exchange System

#### Brings rails to the track quickly, safely and in rolling mill quality. Latest loading technology from over 50 years experience in rail loading train design.

- Safe loading and unloading of long-welded rails
- Preserves rail quality during transport and loading
- Maximum process speed
- Minimum staff requirement
- Reproducible work result
- Always within the bending and stress limits
